Certificates	FSC, ISO, Fumigation certificates, phytosanitary certificates,etc
Application	Furniture, Wooden Crafts, musical instruments, Automotive sector, Construction, Decoration, surfboard, ski boards, kite board, core fillings, etc

Grade Separation

AA grade:

Best paulownia wood materails with excellent sanding and polishing surface. Both face and back sides are without any knots, cracks or holes.

AB grade:

Best paulownia wood materails with excellent sanding and polishing surface.

A side has no knots,cracks or holes. B side just has some small healthy live knots.

30-40% of the total boards are still AA grade.

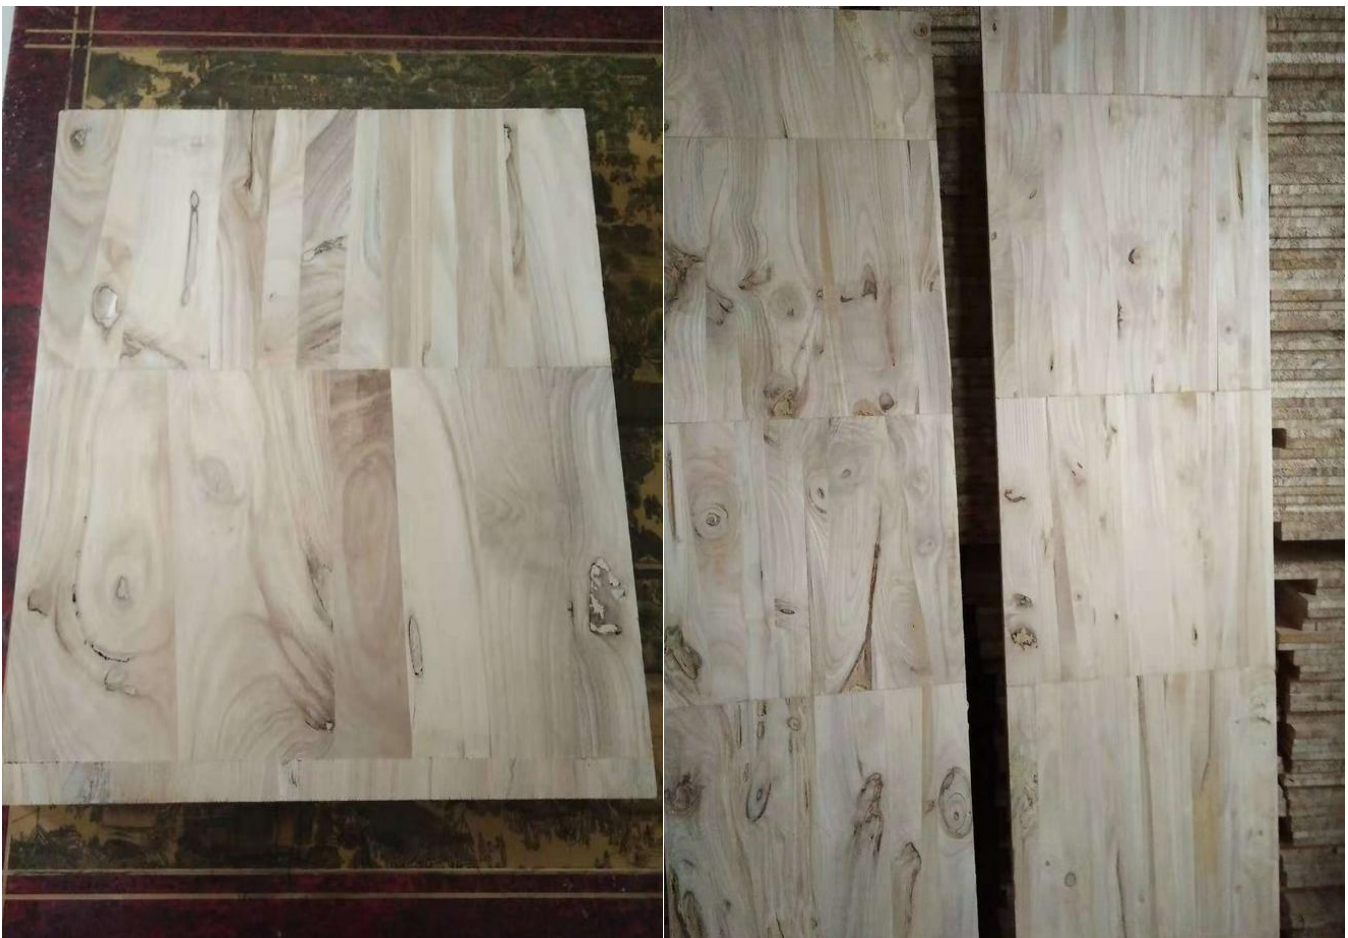

AB- grade:

Best paulownia wood materails with excellent sanding and polishing surface. Both face and back sides have some small random healthy live knots. 25-30% of the total boards are still AAgrade.

CC Grade

CC grade paulownia boards are of the lowest quality level and the price is also the lowest one accordingly. These boards usually could be used as Fillings or core materials. The surface of the boards will still be well polished and sanded. And the knots will be well mended as below photos.

Paulownia finger joint board

Product name	Paulownia finger joint board
Size	1220mm*2440mm or as customized
Thickness	5-75mm or as customized
Color	Nature wood color or bleached or carbonized or painted as requested

Glue	SGS Certified EO level Wood Puzzle Glue (Healthy and Eco-friendly, Strong adhesive power)

This is the common production method for paulownia finger joint here.

Quality Management:

As an ISO 9001:2008 and FSC certified factory, we have the very strict quality management system, from the material wood selection to the final products quality , we always follow the standard processes for ensuring that each of the final boards and wood products can meet the wood industry standards and your special requirements.

CERTIFICATIONS

Strict Inspection:

Delivery quality is the focus of production. Every employee is a quality inspector. Once there is a problem in the process of production, all work will be stopped for rectification. There also will be quality inspector with more than 10 years of experience before shipment. Unqualified products are forbidden to be out of factory to ensure that the product quality is absolutely qualified.

Package and Shipment

Careful Packaging

Specialized Sealing Films are sealed on the six surfaces of the boards package.

Thicker Corrugated Papers are packaged Six-Sides for protecting all of the faces and angles.

Three/Five-Lays Plywood Boards are packed Six-Sides for resistance from outside.

Toughness Packing Belts are strapping strongly on the outside of the Package.

Stronger Wood Pallets at the bottom for making the Unloading easier for shipment receiving.

Fast Delivery

3 km distance of the national road from our Factory to the High-Way Entry.

30 container trailers or more we can arrange for the delivery.

500 km distance of the national high-way road from our factory to the Qingdao Port.

5 hours or less transport time, the cargo can be delivered to the Port for the shipment.

OUR PACKING

Our cartons are standard export ones and we also enforced them with straps.
